VT-05	Leave the 'apptDate' field empty	validation failure
VT-06	Enter a whitespace-only string into the 'e.g., Amoxicil	error message
VT-07	Enter a negative number into the 'e.g., 500mg' field	validation failure
VT-08	Enter a string with special characters into the 'discha	error message
VT-09	Enter a long string into the 'followUp' field	validation failure
VT-10	Poison the 'GRP-XXXX' field with a special character	error message
VT-11	Break form submission with empty required fields	Validation failure for missing fields
VT-12	Test partial form submission	Validation error for missing apptTime

VT-14	Investigate form submission with modified inputs	Validation failure for changed medication dos
VT-15	Test required fields in doctor assignment	Validation error for missing department or wa
VT-16	Break discharge form with invalid dates	Validation error for invalid discharge date
VT-19	Test insurance form submission with missing policy numb	Validation error for missing policy number
VT-20	Test boundary value analysis on discharge date	Invalid date error message
VT-21	Test boundary value analysis on follow-up date	Invalid date error message
VT-22	Test boundary value analysis on apptDate	Invalid date error message
VT-23	Test boundary value analysis on apptTime	Invalid time error message
VT-24	Test boundary value analysis on prescription dosage	Invalid dosage error message
VT-25	Test boundary value analysis on prescription duration	Invalid duration error message
VT-26	Test boundary value analysis on doctor assignment code	Invalid code error message
VT-27	Test boundary value analysis on insurance policy number	Invalid policy number error message
VT-28	Test boundary value analysis on patient's date of birth	Invalid date error message
VT-29	Break form submission with rapid input	Validation failure due to rapid input
VT-30	Test duplicate submissions	Error message for duplicate submission
VT-31	Clear and resubmit form	Validation failure due to changed values
VT-33	Test multi-step form interaction	Validation failure due to multiple medication
VT-34	Break form submission with multiple clicks	Error message for multiple submissions
VT-35	Test form submission with optional fields empty	Validation failure due to empty fields
VT-38	Break form submission with multiple form interactions	Error message for multiple submissions
VT-40	Toggle between modes on the doctor assignment page	Validation failure
VT-41	Stress test the mode switching on the appointments page	Error message
VT-42	Rapidly apply and unapply a mode on the prescriptions p	No UI errors
VT-43	Switch between modes on the discharge page	Validation failure
VT-45	Stress test the mode switching on the insurance page	No UI errors
VT-46	Rapidly apply and unapply a mode on the medical history	Validation failure
VT-47	Switch between modes on the progress notes page	Error message
VT-48	Toggle between modes on the root page	No UI errors
VT-49	Trigger error on empty form submission	error message
VT-50	Test error recovery after fixing one field	error message
VT-51	Validate error clearance after correcting invalid input	error clearance
VT-52	Trigger calculation error and recover	error message
VT-53	Test error handling on empty form submission after succ	error message
VT-54	Validate error handling after clearing all fields	error message
VT-55	Test error recovery after providing valid input	error clearance

VT-57	Test error handling on invalid input	error clearance
VT-58	Validate error recovery after correcting invalid input	error message

3. Application Coverage Summary

Metric	Value
Pages Crawled	10
Pages with Interactive Elements	10
Input Fields Identified	18
Buttons Identified	35
Navigation Links	100
Dropdowns/Selects	0
Test Cases Generated	58
Validation Pass Rate	100.0%

4. Batch Generation Strategy

Tests were generated in 6 adversarial batches. Each batch focused on a distinct exploration category to guarantee structural diversity and maximize bug-finding potential.

Batch	Category	Focus
1	Input Torture and Field Poisoning	Edge-case values: long strings, special chars, min-1/max+1, empty required fields.
2	State Transitions and Form Abandonment	Partial fills, navigate-away-return, recalculate after change, state persistence.
3	Boundary Value Analysis	Exact min, max, zero, +1/-1 boundaries across every numeric input field.
4	Multi-Step Navigation Chaos	Fill on page A, jump to B, return to A -- does state survive?
5	Mode Switching and UI State Dances	Toggle modes mid-fill, switch tabs, check value retention after mode change.
6	Error Recovery and Validation Resilience	Submit empty, fix one field, resubmit; clear after success; recovery flow testing.

5. Test Coverage Classification

Category	Count
Negative Input Tests	21
Boundary Tests	17
General Exploratory Tests	10
Navigation & Cross-Page Tests	5

Zero/Empty Input Tests	3
Validation Enforcement Tests	2

Test cases are automatically classified based on their goals and step patterns. Categories are not mutually exclusive; each test is assigned to its primary category.

6. Validated Test Cases

58 test cases passed anti-hallucination validation. All referenced UI elements exist in the application snapshot.

Each test is marked PASSED (green) or FAILED (red) based on execution results.

7. Structural Validation Confirmation

All 58 test cases were validated against the UI exploration snapshot. The validation engine verified that:

- ✓ All referenced UI element labels exist in the application snapshot.
- ✓ All referenced page paths exist in the crawled page inventory.
- ✓ No hallucinated or invented element labels were detected.
- ✓ Each test case has a valid structure: ID, goal, steps (min 2), and expected result.
